

## Cancer Testimonial by Wolfi

Exactly 25 years ago I was been diagnosed with a very aggressive form of cancer. It was a tough call at that time for a young guy with many of dreams, goals and hopes. After two surgeries, chemo and countless appearances at doctor`s offices, I was left alone with the hope, that the cancer will eventually never come back. My appreciation for life not only changed fundamentally, but I also decided to accept my situation and took the challenge to become proactive and conscious about the way I deal with it.

On this journey I discovered many hidden and widely unknown modalities to strengthen my body, mind and spirit and I literally became an "expert" in holistic and energy medicine.

One of the technologies, which appeared on the market back in the days, was PEMF. Intrigued by the almost sensational claims, I started to use "the magic carpet" for myself and it did not take long until I experienced many remarkable results. Driven by this very unexpected but gratifying development I decided to dig deeper into the scientific and medical background concerning the effects of **pulsed electromagnetic fields** and over time I became an authority and ambassador of this powerful technology. The rest is history: I founded a company and started to share my story and experiences by organizing public lectures all over Germany, Austria and Switzerland. In my first year I drove almost 100,000 miles with my own car from one town to another and invited people to my lectures by simply handing out printed invitations in public places and throwing them into mailboxes. For more than 20 years I have dedicated all my energy, my passion and my motivation to this technology and together with all of you, we became the world leader and trendsetter in this industry.

Looking back I might admit, that without my cancer diagnosis, without my positive attitude to win this fight and without all the wonderful people who supported me during this tough journey, I would never ever be where I am and who I am. I would like to express my gratitude to LIFE itself for teaching me all these lessons, for making me aware, that every day in life is a wonderful gift and also thank you for giving me the wisdom and consciousness to celebrate every day with happiness, pride and thankfulness. I would also like to extend my gratitude to all of YOU, for your support, efforts and trust in myself, in our global corporation and in our wonderful technology.

To all of you, who have experienced challenging situations, please never give up on you, never let yourself down and always encourage yourself to take life as the only real gift you will ever have. Every day is unique and will never ever come back. Live every day to the fullest and always be a great role model for your family, friends and everyone around you, who might benefit from your human compassion.

I am looking forward to at least 50 more mutual, healthy, exciting and successful years to come!

**Never forget: A "NO" you always have, a "YES" you can get :**

***Yours,  
Wolfgang***
